

MEDIAFILES

Life is about choices

In the same amount of floor space:

...You can store 1000 CD's in a traditional cabinet, and have a hard time finding the CD you want when you need it

-or-

...You can store 3600 CD's in the Jalema Filing System and locate the CD you need in seconds.

You decide...

MEDIAFILES

ORGANIZATION AND ACCESSIBILITY IN THE DIGITAL ARCHIVE

Jalema's MediaFiles: The most efficient storage solution for digital

MEDIAFILES SAVE YOU LOTS OF SPACE WHEN STORING CD's, DVD's, DISKETTES, JAZ DISCS AND ZIP DISCS.

Data filing has literally been given a new dimension with digital media such as CD's DVD's and Zip discs.

With Jalema MediaFiles you can store these discs in an efficient and organized fashion, while saving valuable space in your digital archive.

For example, with the Jalema Media Insert File you can file up to 3,600 CD's using less space than it takes to store 1,000 CD's with traditional jewel cases.

EASY TO FILE, EASY TO FIND

Once you have filed something, you naturally want to be able to find it again quickly and easily. Laterally suspended MediaFiles enable you to file efficiently and retrieve quickly. Every MediaFile has a suspension point on which files are laterally and diagonally suspended from a profile bar. This profile bar is mounted on practical wall racks and desk racks, although it can also be built into any cabinet, rack, safe, etc. Lateral filing is exceptionally space saving and enables MediaFiles to be inserted and removed quickly and easily. MediaFiles are also extremely easy to find, thanks to the color coding system. Coding by color saves you 40% of the time you would normally spend looking for that one CD or disc.

↑
A convenient and attractive desk rack is available. The rack can also be stacked to a maximum of 3 units.

Item number:
Desk rack: 6496600

↑ **Item numbers:**
CD/DVD Wall filing rack: 6496700

← CD/DVD Rack: 6496800

Jalema has developed two sturdy metal racks for storing CD's, DVD's and other digital media. These racks are available in 10 or 5 levels, both with an enormous storage capacity. Our free-standing 10-level Media Rack with 2 leg supports allows for free standing and easy access of files with a minimum amount of floor space required. Our 5-level Wall Media Rack is great for small to medium applications and frees up valuable floor space. If preferred, leg supports can also be added to place the rack on the floor or table-top versus mounting on the wall.

Efficient Storage media

Four Functional Designs

MediaFile Insert is constructed of durable blue 270-gram Colorkraft cardboard and can be opened like a book. On the right of the MediaFile is a plastic pocket with a soft lining, in which a total of 2 CD's can be inserted. On the left is a compartment for documents. This version is space saving for users who do not want to save the CD jewel case.
Item number: 5651502

MediaFile Collect is also constructed of blue Colorkraft cardboard, but holds 2 CD-ROM's or Zip discs along with their jewel case. When used with our CD-4 holder (prod.# 6095000) you can store up to 8 CD's in a single file. This MediaFile can stay in the rack and the CD's are simply inserted or removed.
Item number: 5653002

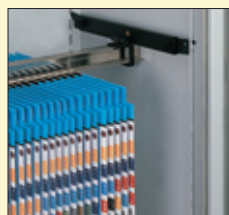

CD/DVD File Basic Simple pocket with a single insert for one CD/DVD and eventual attached booklets. Also including a thumb slit for removing the CD easily. Provided with an imprint and pre-punched holes for the Jockey. The Basic files are available in blue and grey.
Item number: 3601502 (blue)
Item number : 3601507 (grey)

MediaFile Case is constructed of hard PVC and has a transparent pocket that holds a CD or Zip disc (including the case).
Item number: 5650018

Store MediaFiles in existing racks and cabinets

You can mount the profile bars, which hold the MediaFiles, into your existing furniture. Jalema also supplies side brackets for any cabinet, rack, safe, etc., which enable you to store your valuable files within easy reach, but in a safe, fire-resistant cabinet, storage rack, wheeled rack, etc. The side brackets fit into the holes normally used for the shelf supports.

Item numbers:

- Side bracket for racks/cabinet (for pre-slotted style) 9" - 13"D: 5803300
- Side bracket for racks/cabinet (for pre-slotted style) 13" - 24"D: 5805000
- Uni-profile; per meter: 9705200
- Duo-profile; per meter: 9705300

Always Find What You're Looking for With Color Coding

MediaFiles are quick and easy to find once they've been filed thanks to a filing system based on colored Codetabs. These Codetabs save you 40% of the time you would normally spend searching for your storage media. Jalema offers two different color coding systems. The first entails individual

self-adhesive Codetabs, each containing a number, letter, color or year. This version enables you to develop your own system, varying from job numbers to client names, combined with the production month and/or year. You can also choose the Code in One series. If your coding system involves consecutive numbers, you can order ready made series starting with 0000 and number your MediaFiles consecutively.

CD-4 Holder

If more than one CD is needed for a project, you can store the CD's together in the CD-4 holder, which (the name says it all) holds 4 CD's, even though the case is no thicker than a normal CD case. An ingenious mechanism makes it possible to store 4 CD's in the same amount of space normally required for

just one. Talk about an efficient storage solution!
 CD-4 Holder item number: 6095000

CD Transport Trolley

Mobilize your data archive to meet the demands of any project! With a sleek design and 8 bars for CD storage, this trolley represents the next generation in improved workflow and accessibility.

Item numbers:
 Model #6401202 for the narrow (26" wide) and
 Model #6401302 (40.5" wide) for the wide trolley. Both are 17" D x 44" H.

JIM Lite, Windows based indexing system

JIM Lite is an easy to use software program for registration and managing your CD's. The package is very flexible and can be implemented in just about any organization. JIM Lite saves you search time and money. You can download a free version from our website at www.jalema.com

Go with Convenience and Efficiency

Efficiently organize your digital archive by switching over to MediaFiles, the ideal storage system for CD's, DVD's, Zip discs and other digital media.
